

MGC Barrier Gate

Parking Management

These access barriers from Magnetic are cost-optimised solutions for access control at car parks, company grounds, residential buildings and similar sites.

When the stipulated safety equipment is installed, these barriers – with their low impact forces – are approved for use wherever the movement of persons cannot be ruled out for structural reasons.*

At the heart of the Access series is the innovative MHTM™ drive that is distinguished by its energy efficiency, lack of maintenance and long service life

Low Operating Costs

- Thanks to their high energy efficiency, extremely long service lives, and simple maintenance, barriers from Magnetic are particularly cost-effective – an investment that will certainly pay off!

Innovative drive technology

- The MHTM™ drive unit is maintenance-free, energy-efficient and quiet. The high torque guarantees best possible operation even under extreme weather conditions.

Legal security & Easy access to components

- All Magnetic barriers have a Declaration of Conformity in compliance with the Machinery Directive and a Declaration of Performance in line with the Construction Products Directive. Thus operators and those responsible for commissioning are always on the safe side in questions of liability.
- Two simple steps: control systems and the drive unit are easily reached by removing the cover and front plate. This increases user-friendliness and accelerates commissioning and service.

Technical Data:

Rated Voltage: 85–264 VAC, 50/60 Hz

Power Consumption: Max 30W

Drive Technology: MHTM™

Installation: Ground

Duty Cycle: 100%

Dimension: 315 x 360 x 915mm

Enclosure rating: IP54

Temperature : -30 to +55 °C

Speed Open/Close : 2.2s

Control System : MGC

Weight : 40kg

Standard Color : RAL2000,RAL9006
